Eagle Investment Philosophy

Eagle believes the appropriate way to build and preserve wealth through investing in Master Limited Partnerships is to focus on MLPs that have strong, stable, and sustainable business models. Eagle's investment methodology favors companies with limited or no commodity price exposure, strong balance sheets, and proven management commitment that are attractively valued based on current and prospective distributions.

Eagle Investment Process

Eagle's dedicated MLP investment team builds detailed cash flow models to analyze the cash distribution power of each MLP over a multi-year time horizon. Portfolios are constructed "bottom-up" with average holding periods of approximately five years.

MLP Investment Thesis

MLPs offer investors the opportunity to participate in the expected growth of U.S. energy production with lower commodity price risk, more stable cash flows, and higher current distributions than traditional energy investment options like Exploration and Production (E&P) companies.

MLP Highlights

- **Essential Infrastructure:** MLPs build and operate pipelines and storage facilities for the transmission of vital domestic energy supplies
- **Distributions:** Majority of cash flows are distributed to unit holders
- **Tax Efficiency:** Distributions are largely a return of capital
- **Inflation Protection:** Distributions have grown over time, providing an effective inflation hedge
