STRATEGY OVERVIEW

Eagle Global Advisors believes that investments in high quality, growth-oriented global, large-capitalization companies provide investors with attractive long term, risk-adjusted returns. The strategy targets international companies that generate consistent earnings, cash flows and returns on equity as well as those with strong management teams that reward patient investors with above market returns while limiting risk over the long-term.

*Benchmark: MSCI World

EGA Global Equity Composite - The EGA Global Equity Composite consists of those equity portfolios invested in both US equities and international equity ADRs and/or ordinaries. The Eagle equity investment philosophy focuses on identifying the securities of large capitalization companies with improving growth potential that are not fully recognized by current valuations.

- For GIPS purposes, Eagle Global Advisors, LLC is an independent investment advisor, registered with the SEC, actively managing individual investment portfolios containing domestic equity, international equity, master limited partnerships, and domestic fixed income securities, (either directly or through a sub-advisory relationship), for mutual funds, high net worth individuals, retirement plans for corporations and unions, financial institutions, trusts, endowments and foundations. SEC registration does not imply a certain level of skill or training.
- Eagle Global Advisors, LLC claims compliance with Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with GIPS standards. Eagle Global Advisors, LLC has been independently verified for the periods 1/1/1997 to 12/31/2021. The verification reports are available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein. Only direct trading expenses are deducted when presenting gross of fee returns. In addition to management fees, actual client returns will be reduced by any other expenses related to the management of an account such as trustee fees or custodian fees. The reporting currency is the U.S. dollar. Returns are calculated net of non-reclaimable foreign withholding taxes on dividends, interest, and capital gains. Reclaimable withholding taxes are not accrued, but are cash basis as received. Eagle uses the asset-weighted standard deviation as the measure of composite dispersion of the individual component portfolio gross full period returns around the aggregate composite mean gross return. The 3 year annual standard deviation and internal dispersion are calculated using Gross of Fees returns. If the composite contains 5 portfolios or less (<=5) for the full period, a measure of dispersion is shown as not meaningful (N/A) and the number of portfolios is not reported. Past performance cannot guarantee comparable future results. All investments involve risk including the loss of principal. This presentation is only intended for investors qualifying as prospective clients as defined by GIPS.
- The composite start date is January 1, 2007. The composite was created in January 2007. The composite includes all global equity portfolios where the firm has full investment discretion, the client pays a fee, the portfolio has over \$250,000 in assets and the portfolio properly represented the intended strategy at the end of the calendar quarter. Portfolios smaller than the minimum are deemed incapable of sufficiently diversifying into this investment style and are excluded from the composite as being not fully discretionary. All performance returns assume the reinvestment of dividends, interest, and capital gains. Returns are calculated net of non-reclaimable foreign withholding taxes on dividends, interest, and capital gains.
- The benchmark is the MSCI World Index, a free float-adjusted market capitalization index that is designed to measure the equity market performance of developed markets. Indexes are net of withholding tax.
- The indices shown are for informational purposes only and are not reflective of any investment. As it is not possible to invest in the indices, the data shown does not reflect or compare features of an actual investment, such as its objectives, costs and expenses, liquidity, safety, guarantees or insurance, fluctuation of principal or return, or tax features. Indices do not include fees or operating expenses and are not available for actual investment. Indices presented are representative of various broad based asset classes. They are unmanaged and shown for illustrative purposes only. The volatility of the indices is likely materially different than the strategy depicted.
- The Eagle list of composite descriptions is available upon request. Eagle policies for valuing portfolios, calculating performance and preparing compliant presentations are available upon request.
