EAGLE INVESTMENT PHILOSOPHY

Eagle believes the appropriate way to build and preserve wealth through investing in Energy Infrastructure is to focus on companies that have strong, stable, and sustainable business models. Eagle's investment methodology favors companies with limited or no commodity price exposure, strong balance sheets, and proven management commitment that are attractively valued based on current and prospective distributions.

EAGLE INVESTMENT PROCESS

Eagle's dedicated Energy Infrastructure investment team builds detailed cash flow models to analyze the cash distribution power of each Energy Infrastructure company over a multi-year time horizon. Portfolios are constructed "bottom-up" with average holding periods of approximately five years.

ENERGY INFRASTRUCTURE INVESTMENT THESIS

Energy Infrastructure companies offer investors the opportunity to participate in the expected growth of U.S. energy production with lower commodity price risk, more stable cash flows, and higher current distributions than traditional energy investment options like Exploration and Production (E&P) companies.

ENERGY INFRASTRUCTURE HIGHLIGHTS

- **Essential Infrastructure:** Energy Infrastructure companies build and operate pipelines and storage facilities for the transmission of vital domestic energy supplies
- **Strong Cash Flow:** Cash flows generated are stable and predictable
- **Distributions:** Majority of cash flows are distributed to unit holders
- **Tax Efficiency:** Distributions are largely a return of capital**
- **Inflation Protection:** Distributions have grown over time, providing an effective inflation hedge
